

PLYWOOD INDONESIA

DESCRIPTION

Indonesian plywood is well known for its high quality and is made from carefully selected hardwoods. It is suitable for both interior and exterior applications, depending on the type of bonding, which can be WBP (Class 3) or MR (Class 1). The high quality of the deck veneer, which is completely sealed and perfectly sanded, makes it easy to apply paint or other coatings.

APPLICATIONS

The most common use for Indonesian plywood is interior and exterior joinery.
