

# FILM FACED PLYWOOD

## INDONESIA

### DESCRIPTION

**Indonesian film faced plywood** is a high quality plywood panel coated with a phenolic film. This film layer provides a smooth, water and wear resistant surface. The core is composed of hardwood veneers. Always finish the edges with a suitable sealant when used in damp conditions.

### APPLICATIONS

Suitable for demanding applications such as formwork, transport flooring and other structural purposes.

#### THICKNESSES (mm)

4 - 6 - 8 - 9 - 12 - 15  
18 - 21 - 24 - 30

#### SIZES (mm)

2500 x 1250
