THE NEW GENERATION OF INDUSTRIAL COATINGS OF LIBERT PAINTS

The technology of industrial coatings has evolved rapidly over the past two decades. The quality level of top coats is getting higher and higher. The new Libert paint systems are the result of in-depth technical expertise focused on economic significance. Thanks to the combination of new raw materials and new colour formulations, the new Libert paint systems meet the current quality requirements:

- **cost reduction:** binders with direct adhesion
- **time-saving:** advantageous drying times for process optimization
- **long-term protection and minimal maintenance** of steel constructions, rolling stocks, machinery, ...
- **universal adhesion:** very good adhesion on various types of surfaces (metal surfaces, galvanized substrates, steel, aluminium, stainless steel, OSB boards, various plastics, ...)
- **high resistance:** approved on QUV, salt spray, mechanical and chemical tests (test reports available on request)
- **easy to use:** easy to spray, easy to process
- **new colours** available on customer demand thanks to the **Innovatint** colour system

CRYLTANE SPRAY DTS

Two-pack acrylic polyurethane paint with an excellent adhesion on steel, aluminium, galvanized steel and stainless steel.

FIXTANE PRIMER

Two-pack anticorrosion polyurethane primer with a very good adhesion on steel, sandblasted surfaces, aluminium, OSB plates, galvanized steel, various plastics (hard PVC, ABS, polyester, ...).

FIXTANE FINISH

Two-pack polyurethane lacquer with high quality properties. Fixtane Finish is used as finish coat on Fixtane Primer for the protection of rolling stock, machines, furniture, ... Fixtane Finish is available in two gloss degrees: satin and high gloss.

MONOPRIM

Quick drying one-pack anticorrosion primer for metal surfaces and steel constructions.

MONOTOP

Fast drying, one-pack, industrial alkyd paint with an active anti-corrosion pigment. Monotop is available in two gloss degrees: satin and high gloss.

OXYPRIM

Two-pack anticorrosion epoxy primer with good adhesion on steel and sandblasted surfaces. It is the appropriate primer for the anticorrosion protection of constructions, storage tanks,...
