

SORTING AND REFINING LINE AND COMPOSTING EQUIPMENT

Vietnam

Problem

Very complex machines to paint, requiring a high performance paint system, resistant to residues of nitrogen composting and corrosive decomposing materials.
New steel structures, painted in cabin and steamed.

Solution

The paint system used by Ménart, a manufacturer of composting and recycling equipment, is designed for applications that meet ISO 12944 standards.
After cleaning and degreasing SA 2.5 (sandblasting):

- Primer: **Cryltane VHA 006**.
- Top Coat: 2 layers of **Mixtane Spray** in the yellow and grey colours.
