TITANPRESS-TX

SMART ASSEMBLING SYSTEMS

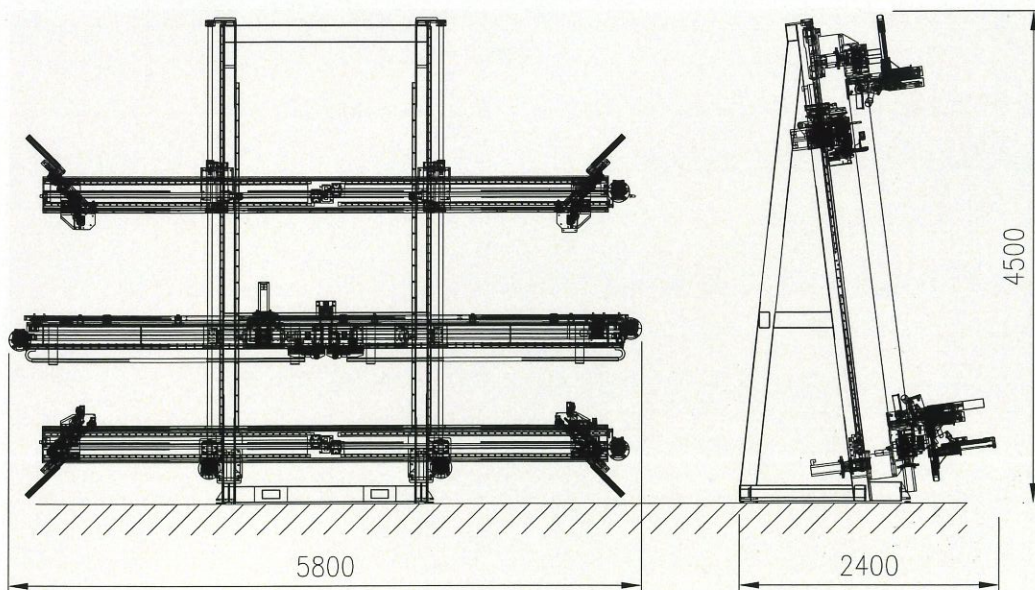

- /// 7 CNC controlled brushless axes: fast and precise
- /// Fast pre-positioning, full automatic work-cycle
- /// Assisted loading operation
- /// No pre-assembling even for complex frames
- /// Options: automatic nailing, milling, drilling
- /// Automatic out-feed of assembled frames
- /// Production list from file: paperless workstation
- /// Clear and simple operator interface on PC
- /// On-line remote assistance

Huge capacity improvement by assembling complex frames directly on the machine

Assembling process efficiency improved by integrating automatic gluing 4Glue-L and TITANPRESS-TX

Standard frame dimensions

Horizontal (min/max):
250/4500mm

Vertical (min/max):
250/3000mm

Standard press dimensions

Width: 5800 mm

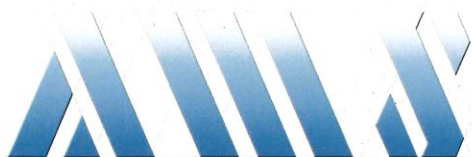

Height: 4500 mm

Depth: 2400 mm

SERVIZI

INFERMAT

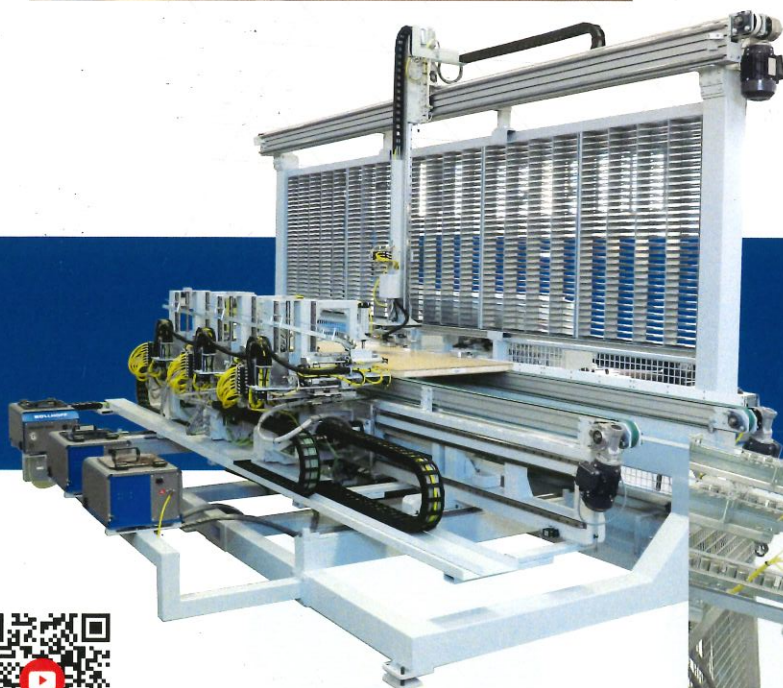

EFFICIENT HARDWARE MOUNTING

- Automatic mounting of all kind of hardware on doors, door frames and window frames and sashes
- Scalable and customized solutions according to production volume, mix variety and capacity needed
- Easily integrated in machining lines to reduce material handling and manual operations

INFERMAT - SC

**LOCK AND HINGES MOUNTING
ON DOORS**

High capacity through-feed solution with fully flexible magazine to manage many different types of locks and hinges

The magazines can be replenished while the machine is working
Different types/colors of screws
Fully automatic: no manual set-up needed

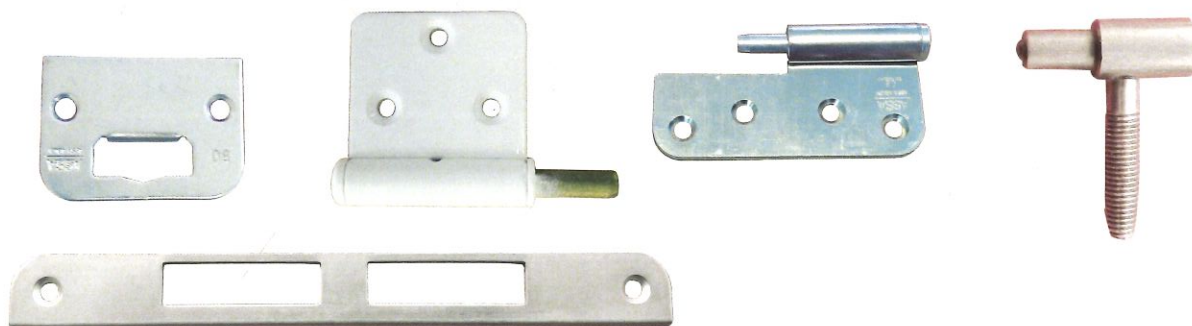

INFERMAT - P

**HINGES AND LOCK-KEEPER MOUNTING
ON WINDOWS AND DOOR FRAMES**

Precise CNC controlled positioning
High capacity through-feed solution
Flexible magazines for several
types of hardware

Multiple handling units to increase efficiency
Different types of screws selectable
Integrated CNC drilling unit
